## QUICK TACH TRACTOR MOUNTED SPRAYERS

As an industry-leader in saddle tank systems, Demco Quick Tach and SideQuest tractor mounted fertilizer tanks attach securely and easily with high-quality Demco mounting brackets and are designed to help improve efficiency and effectiveness in the field.

### 600 GALLON 4WD ARTICULATING TRACTORS

TANKS: two 300 gallon tanks

GROUND CLEARANCE: 22" - 25"

TRANSPORT WIDTH: 15'

### 600 GALLON INLINE TANK MECHANICAL FWD TRACTORS

TANKS: two 300 gallon tanks

GROUND CLEARANCE: 30"

TRANSPORT WIDTH: 16' 6"

By retaining driver visibility and featuring about two feet of ground clearance, Demco tanks are as usable as they are durable. The tanks come with dual jet agitation, sump, molded sight gauge and a 12" fillwell with no-splash cover.

The tanks are made from slim-line polyethylene and feature dual jet agitation, sump, molded sight gauge and fillwell with a no-splash cover, as well as a poly baffle. Farmers love our high clearance brackets. Furthermore, our centrifugal plumbing kits feature single section or three section electric controls.

Doubles the capacity of our Quick Tach to 1,200 gallons. This high capacity system comes with a 16" fillwell and better visibility due to their longitudinal design.

The extended rear axle spindle mount means you don't have to risk your tractor's front axle and chassis with a heavy and burdensome mount -- it attaches securely to the rear axle. Furthermore, the SideQuest longitudinal mounting design enhances visibility and further reduces stress on your tractor, which helps increase productivity, performance and safety. SideQuest tanks come with a 16" fillwell and distribute 75 percent weight to the rear axle -- rear duals are required.

## SIDEQUEST® 1200 TRACTOR MOUNTED SPRAYERS

Demco SideQuest saddle tanks systems are the industry leader. The SideQuest mounting design and location provide excellent operator visibility, reduce stress to the tractor, and deliver performance for your farming operation. SideQuest is the product to consider when applying fertilizer while planting.

### 1200 GALLON SIDEQUEST® 4WD

TANKS: two 600 gallon tanks

GROUND CLEARANCE: 21" - 23"

TRANSPORT WIDTH: 17' 2"

### 1200 GALLON SIDEQUEST®

TANKS: two 600 gallon tanks

16' 11" when straddle duals are set on  
120" centers

TRANSPORT WIDTH 36" ROW SPACING:  
18' 11" when straddle duals are set on  
144" centers

TRANSPORT WIDTH 40" ROW SPACING:  
20' 3"

### 1000 GALLON SIDEQUEST®

TANKS: two 500 gallon tanks

If your tractor is on tracks, we have the perfect product for you: the 1000 Gallon SideQuest® Track Unit, which mounts easily on most larger tractors. Featuring two 500 gallon tanks with a 16" fillwell, these Demco saddle tanks are just what you need for your tractor on tracks.

When 40" row spacing is needed, consider the Demco 1000 Gallon SideQuest® - 40" Row Spacing tractor mounted fertilizer tanks. With a 16" fillwell and an extended rear axle spindle mount that moves more weight to the rear (rear duals required), your tractor should enjoy a long life of operation with Demco tractor mounted tanks.

But if you don't need 40" row spacing, check out the Demco 1000 Gallon SideQuest® Side Mount saddle tanks. These SideQuest® tanks come with a 16" fillwell and mount on an extended rear axle spindle to better distribute weight (75 percent to rear, 25 percent to front), which **relieves stress on your tractor's axles** (dual rears required).
