

STABILIZER

- Independently suspended oscillating bogie wheels supply more uniform ground contact
- Rubber springs & pivoting bogies significantly reduce shock loads & vibration
- All pivots and bogie rollers utilize self-lubricated sleeve bearings, requiring no daily greasing
- Oil bath hubs
- A single, large-diameter compression spring provides active tension for the track belt
- The spring tensioner requires no daily adjustment, eliminating the hassle of hydraulic or other tension systems

CAMSO

- Heavy duty wheel hubs with oil bath lubrication
- Stamped steel wheel construction
- Double oscillating bogie wheels with pivoting front & rear idlers maximize ground contact & support over uneven terrain
- Simple, mechanical spring track tensioner actively maintains tension
- Approved for speeds up to 20 mph

SOUCY

- 4 bogie track system
- Load capacity up to 110,000 lbs with a large footprint for maximum flotation
- Designed for fitment of grain carts using a machine-specific axle for maximum durability under heavy loads
