NOTE:

Do Not Exceed 75 GPM
of Oil to Hydraulic Motor.
Fill motor with Hydraulic oil
BEFORE running.

ATTENTION

Case Drain Line **MUST** be connected to
Zero Return Port on Tractor before running
Hydraulic Motor.

Remove Bearing
before mounting
Motor Mount
Bracket.

TORQUE SPECIFICATIONS

Torque figures indicated are valid for non-greased or non-oiled threads and heads unless otherwise specified. Therefore, do not grease or oil bolts or capscrews unless otherwise specified in this manual. When using locking elements, increase torque values by 5%.

* GRADE or CLASS value for bolts and capscrews are identified by their head markings.

BOLT TORQUE DATA FOR STANDARD NUTS, BOLTS, AND CAPSCREWS.

Tighten all bolts to torques specified in chart unless otherwise noted. Check tightness of bolts periodically, using bolt chart as guide. Replace hardware with same grade bolt.

NOTE: Unless otherwise specified, high-strength Grade 5 hex bolts are used throughout assembly of equipment.

* BOLT TORQUE FOR STANDARD BOLTS
