INSTALLATION INSTRUCTIONS

1. Read instructions thoroughly before beginning.
2. Open trunk and remove threshold by pulling up on it.
3. Remove floor cover and set both items aside. On both sides carefully remove 3 clips on felt liner shown in Figures 1 & 2.
4. Pull back felt liner to identify taillight connectors shown in Figure 3. They will be similar to those on RV harness.
5. Locate a clean and accessible mounting location on vehicle near RV harness ends within reach of ring terminals. Remove any debris or undercoating to expose a clean metal surface and drill a 3/32" hole.
Caution: Do not drill into any exposed surfaces or through the vehicle body.
6. Attach ring terminals on White wires using screw provided.
7. Route portion of RV harness with connectors containing Green wires down to bottom of side wall panel along the rear of vehicle behind threshold and up behind passenger side felt liner. Repeat Step 4 for connector plugging.
8. Cut cable ties on 4-Flat portion of harness. Route 4-Flat portion of RV harness with connector ends containing Green wire to grommet located in rear center wall of vehicle shown in Figure 5. Unseat grommet, make a slit in it and fit around 4-Flat wire. If so apply silicon around area to seal.
9. Underneath vehicle route 4-Flat along bumper frame to passenger side. Clean a spot on bumper and apply cable tie pad and secure 4-Flat with cable tie shown in Figure 6.
10. On left side of passenger’s side rear wheel well remove screw holding wheel well cover shown in Figure 7. Route a fish tape up and over wheel well and secure it to 4-Flat. Pull 4-Flat up and over wheel well.
11. Route 4-Flat towards front of vehicle underneath trim panel on passenger side and secure with cable ties provided.
12. Once 4-Flat is routed behind trim panel, place cable tie pad to frame of vehicle shown in Figure 8 and secure 4-Flat with cable tie provided.
13. From inside engine compartment route fish tape down through wheel well shown in Figure 9. Secure 4-Flat to fish tape and pull into engine compartment.
14. Continue routing 4-Flat to driver’s side of engine compartment shown in Figure 10. Find a location suitable to mount the 4-Flat bracket. Using the bracket as a template mark two holes and drill two 3/32" holes and attach the bracket using the two remaining screws.
   *Caution: Take care not to drill through the body or any exposed surface.*
15. With the 4-Flat extension plugged into the RV harness on one end and the motorhome on the other, test that the functions work on the Chevrolet Malibu. These functions will only work on the brake/tail combination lamp.
4-Flat Harness Color Code:
White - Ground
Brown - Tail Lights
Green - Right Turn and Brake Signal
Yellow - Left Turn and Brake Signal
When not in use store the 4-Flat extension in the vehicle’s glove box.
16. At the rear of the vehicle secure any loose wires to the vehicle’s crossmember using cable ties provided. Re-install taillights to vehicle.

Review instructions before installation.
