RV TOW Harness Wiring Kit

INSTALLATION INSTRUCTIONS

Fits: 2013 Ford Escape

Kit Includes:
(1) Wiring Harness with 4-Flat Connector
(1) 48" 4-Flat Extension
(20) 15" Cable Tie
(1) 4-Flat Bracket
(3) #8 Self-Tapping Ground Screw

Caution: Do not drill into any exposed surfaces or through the vehicle body.

1. Read instructions thoroughly before beginning.

2. Open rear hatch and using a Torx T20 screwdriver remove two screws on threshold shown in Figure 1A and a flat screwdriver to remove two plastic clips shown in Figure 1B. Gently pull up to remove threshold and set aside.

3. Using a small flat screwdriver, remove plastic covers that cover bolts that hold taillights in place on both sides. Using an 8mm socket remove 2 bolts that hold both taillights in place shown in Figure 2. Carefully remove taillights by gently pulling away from vehicle taking care not to damage the alignment tabs. Unplug 4-pin connectors similar to those found on RV harness and set aside. Inspect for dirt and debris and clean if necessary.

4. Starting on drivers side unseat vehicle harness grommet and make a slit in it to allow for the RV harness wiring to pass through. Route RV harness ends containing Yellow wire behind interior panel, through grommet opening to taillight cavity shown in Figure 3. Plug connectors into separated vehicle harness connectors until they lock into place. Pull on connectors to ensure the locks are engaged. Reseat grommet and it may be necessary to apply silicone to seal grommet where cut was made.

5. Locate a clean and accessible mounting location on vehicle near RV harness ends within reach of White wire and ring terminal. Remove any debris or undercoating to expose a clean metal surface and drill a 3/32" hole.

6. Attach ring terminal on White wire using screw provided.

7. Route portion of RV harness with connectors containing Green wires down to bottom of side wall panel along the rear of vehicle and up behind passenger side panel. Repeat Step 4 for connector plugging.

8. Cut cable ties on 4-Flat portion of harness. Route 4-Flat portion of RV harness with connector ends containing Green wire to grommet located on drivers side of vehicle shown in Figure 4. Unseat grommet, make a slit in it and fit around 4-Flat wire. If so apply silicon around area to seal.

9. Underneath vehicle route 4-Flat wire over exhaust heat shield to driver's side rear wheel well area. Remove bolts using a 7mm socket on right side shown in Figure 5.

10. On left side of driver's side rear wheel well remove bolts using a 7mm socket on trim plate shown in Figure 6. Route a fish tape over wheel well cover, secure 4-flat to it and pull through wheel well.

11. Route 4-Flat towards front of vehicle underneath trim panel on driver's side. Secure with cable ties provided shown in Figure 7.

12. At driver's side front wheel well remove push clips with a flat screwdriver shown in Figure 8.

13. Route fish tape from inside engine compartment, shown in Figure 9, to driver's side wheel well down to location from Step 12. Secure 4-flat to fish tape and pull into engine compartment.

14. In engine compartment find a location suitable to mount the 4-Flat bracket. Using the bracket as a template mark two holes and drill two 3/32" holes and attach the bracket using the two remaining screws.

*Caution: Take care not to drill through the body or any exposed surface.*

15. With the 4-flat extension plugged into the RV harness on one end and the motorhome on the other, test that the functions work on the Ford Escape. These functions will only work on the brake/tail combination lamp.

4-Flat Harness Color Code:
White - Ground
Brown - Tail Lights
Green - Right Turn and Brake Signal
Yellow - Left Turn and Brake Signal

When not in use store the 4-flat extension in the vehicle's glove box.

16. At the rear of the vehicle secure any loose wires to the vehicle's crossmember using cable ties provided. Re-install taillights to vehicle.

NOTE: THE RV HARNESS ALSO INCLUDES A CONNECTION POINT LABELED "FOR TRAILER TOW USE ONLY: TAILLIGHT REQUIRED." IF YOU DECIDE TO LEAVE YOUR RV HARNESS ON THE VEHICLE AT ALL TIMES AND WANT TO TOW A TRAILER SIMPLY PLUG IN 4-FLAT HARNESS PART NUMBER 85350 AND YOU'RE READY TO TOW.
